# Medical Equipment Lifting Systems

## Hospital Bed Service Lift

Hospital beds have progressively become more complex and feature-packed over the years. These sophisticated beds provide superior patient comfort and ultimate control to providers and caregivers alike. All of this does not come without presenting additional challenges to hospital equipment maintenance personnel worldwide.

Today's beds are not only heavier, they contain more moving parts, linkages, drive motors, electronics, etc. Servicing and maintaining these high-tech beds has never been more important or demanding. Utilizing the most effective tools to safely and productively perform hospital bed maintenance is a top priority of professional staff at health care operations everywhere.

SVI meets these needs as one of the medical industry's first and most economically versatile supplier of the safest hospital bed service lifts available.

Easily service and maintain hospital beds and other medical equipment, such as large wheelchairs, when you use SVI's Medical Equipment Lifts.

Options available to meet your needs!
